Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.							
Attachment(s) 1) Notice of References Cited (PTO-892) 2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date	4) Interview Summary (Paper No(s)/Mail Da 5) Notice of Informal Pa 6) Other:						

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The amendment to claim 1 introduces new matter with respect to two issues. The first being the narrowing of the range of the clearance to "at most 3 µm"; the second being the additional language of "a single restriction mechanism".

With respect to the dimension of the clearance, there is no support in the original disclosure for having as the upper limit of the clearance 3 μ m. The specification does mention the dimension of 3 μ m in paragraph [0023] but not as an upper limit of the clearance. The original disclosure at [0023] clearly defines "the phenomenon in which the damping ratio increases with an increase in the depth of the air groove, appears when the bearing clearance is preferably no larger than 5 μ m. As a condition of the exemplary embodiment of the present invention, therefore, the bearing clearance h is set to be preferably not larger than μ 5 m." That is, no mention of an upper limit of 3 μ m. Such an attempt to redefine the upper limit of a critical parameter constitutes new mater.

With respect to the phrase "a single restriction mechanism", Applicant has failed to positively point out where in the original specification this language can be found. Figure 1, of which Applicant refers in the remarks to distinguish over the prior art does not provide enough

evidence that at the time the invention was made the gas bearing I limited to a single restriction. Figure 1 is described as a "schematic illustration of a bearing of an orifice type according to an exemplary embodiment of the present invention". There is no limit on the type of restriction provided, indeed, Figure 1 is schematic, and cut off above the restriction. Thus there is no support in the original disclosure for the inclusion of "a single restriction mechanism" in the claim as amended.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas R. Hannon whose telephone number is (571) 272-7104. The examiner can normally be reached on Monday-Thursday (8:30-7:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Ridley can be reached on (571) 272-6917. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
